

# Communication & HR manager

## About us.

As startup dedicated to public transport, our vision is to make buying tickets for passengers as easy as possible. Therefore, we develop a ticketing system that automatically detects beginning and end of a ride. Based on the detection, it is possible to provide passengers the cheapest ticket.

The problem we are trying to solve is challenging: developing a reliable ride detection algorithm based on data from smartphone sensors while creating a solution that attracts both passengers and public transport providers.

We believe that together we can build a great solution that will have a major impact on public transport.

## Responsibilities.

- develop and implement a social media strategy
- shape how customers and applicants see golane
